RE: Community Development Block Grant (CDBG) Pavement Rehabilitation
(Mill Creek Rd. & Green Meadows St.)

Dear Resident,

On Tuesday, May 22, the Pflugerville City Council approved an agreement with Smith Contracting Company to rehabilitate Mill Creek Road and Green Meadows Street starting this summer. In addition to the street rehabilitation, drainage improvements are also included in the project scope.

This letter is intended to inform residents about the upcoming construction activities on your street. Rehabilitation and construction of drainage structures has begun and street rehabilitation work on affected streets will begin mid-July, weather permitting. The roads will remain open to local traffic for the duration of the project and each street will be accessible for residents to get into their properties. Timing and phasing of the street rehabilitation will be dependent on existing infrastructure and any conflicts that might exist that were not identified in the geotechnical and utility evaluation. All work will be completed by 7 p.m. daily.

Door hangers will be used to communicate project information directly to residents as well as the City's website (www.pflugervilletx.gov/projects) and city social media platforms (Facebook, Twitter, Nextdoor). City staff have coordinated with Pflugerville Police, Travis County Emergency Services District #2, the United States Post Office, trash/recycling provider Waste Connections, Austin Water and other entities that could be affected by construction.

Please make sure to remove any plants/landscaping/items in the right of way that you wish to keep prior to construction. Mail service will not be interrupted as existing mailboxes will be relocated to the opposite side of the street from where construction activities are occurring.

While we know this will be an inconvenience to the affected homeowners, the City plans to provide adequate notice to minimize interruption. The contract for the project work is anticipated to last approximately six months, weather permitting. A map of the project area is provided on the back of this letter.

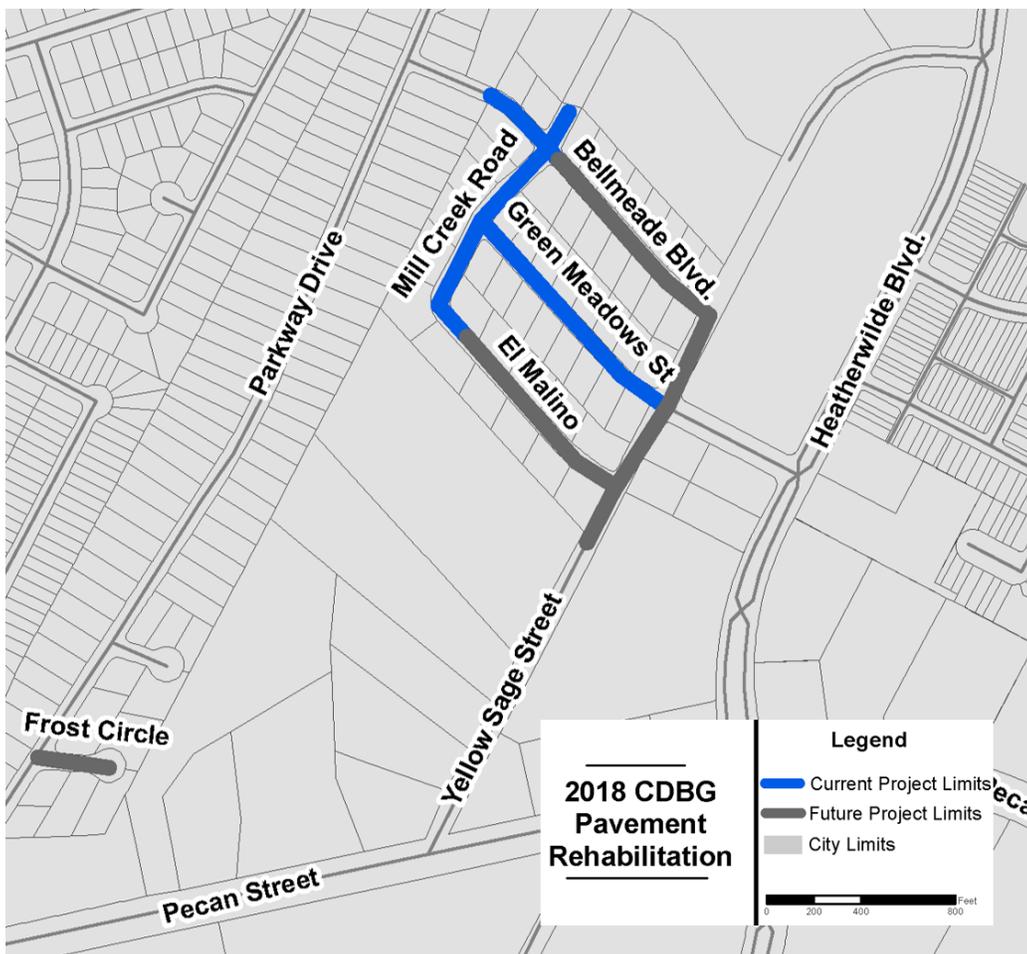

The City appreciates your patience and support with this project. Additional project information can be accessed on the City's website at www.pflugervilletx.gov/projects. If you have questions, please do not hesitate to contact the City's Capital Improvement Program staff at projects@pflugervilletx.gov or by phone at (512) 990-6400.

Sincerely,

Chad Wood, P.E., PTOE
Senior Transportation Engineer and Project Manager
